

Architectural and Engineering Specifications

Wireless DCP

The control application for iPhone or Android devices shall allow wireless remote control of MTX/MRX series signal processors. The application has the function to control the volume levels, on/off controls, preset recall and playing music or announcements from SD card of the MTX/MRX processor. Two different types of PIN can be used to limit user access. One for administrator, one for staff. Certain functions are available only when logged into the MTX/MRX signal processor using an administrator PIN. The Controller screen is provided to remotely control the connected MTX/MRX processor. The Controller screen displays controllers configured using MTX-MRX Editor. The positions of the faders and switches shall be edited using the application and saved as a preset. These presets can then be recalled from the application. The preset screen is provided to recall presets. The Player screen is provided to operate the SD Player. It shall display a list of MP3 and WAV files stored in the SD memory card that is inserted into the MTX/MRX processor's SD memory card slot. The application shall be downloaded from Apple's App Store and Google Play. The application shall be operated on Apple iOS 5.1.1 or later and Android 4.2 or later.

The control application for iPhone or Android devices shall be Wireless DCP.
